Matterhorn boots have been protecting and serving miners worldwide for decades, designing safe, innovative products for the coal, precious metal, mineral, oil and gas industries.

As mining continues to expand its reach as an ever-growing global enterprise, Matterhorn is expanding our distribution and service centers to bring you boots to keep you safe, regardless of where you are located in the world.

# NEW! FOR 2019

## MATTERHORN'S NEW METGUARD BOOTS!

THESE NEW MATTERHORN  
BOOTS CONTAIN WATERPROOF  
SCUBALINER AND INTERNAL  
METGUARDS PROVIDING THE  
PROTECTION AND COMFORT  
THAT YOU DEPEND ON.

**MT210**

**MT716**

## MATTERHORN'S BEST COLD WEATHER BOOT

THIS MATTERHORN BOOT HAS A SPECIAL VIBRAM® ALPINE ARCTIC GRIP PRO OUTSOLE THAT IMPROVES GRIP ON SLIPPERY, WET ICE. COMBINED WITH 600 GRAMS OF THINSULATE™ INSULATION, YOUR FEET WILL BE COMFORTABLE AND SAFE.

**MT108**

### BOOT COMPONENTS

Over the years, Matterhorn® has developed partnerships with the top component manufacturers in the world. By using superior components, we can offer high-performance technologies, comfort qualities and protective features in our boots that meet the specific needs of each individual within the industries we serve.

Made in the U.S.A. from global parts.  
Proudly made in the quaint country town of Martinsburg, PA. As a world class manufacturer, we use both traditional and state-of-the-art equipment and carefully follow a 125-step manufacturing process.

Matterhorn TigerTip®:  
Our patented high-abrasion boot tip – a Matterhorn innovation – provides superior protection and extends the life of the boot.

Nytek®: A revolutionary alternative to leather, Nytek offers advantages that leather simply cannot match. Specially formed, high-performance nylon microfibers are nearly indistinguishable from the collagen fibers of leather, yet are three times stronger and also provide better abrasion resistance.

### SAFETY FEATURES:

**Steel Toe:** Footwear that meets or exceeds the ASTM Standards for compression and impact testing rating of I-75/C-75.

**Composite Toe:** A Non Metallic Safety Toe for environments where steel is not appropriate. Reduced cold-transfer in cooler environments and meets the ASTM Standards for compression and impact testing rating of ASTM F2413-18.

**Aluminum Toe:** Weighs less than steel and meets the ASTM Standards for compression and impact testing rating of ASTM F2413-18.

**Flexible Internal Metatarsal Guard™:** Combined with a safety toe, the internal metatarsal guard provides additional protection against dangerous on-the-job accidents. Meets all current ASTM requirements for safety toe standards.

**Puncture Resistant:** Meets all current ASTM and CSA requirements for safety standards.

**Electrical Hazard:** Footwear tested by an independent lab that can withstand applications of 18,000 volts at 60hz for one minute without leakage. Meets all current ASTM requirements.

**Slip Resisting:** Soles designed and constructed with materials which provide maximum grip on slippery conditions.

**SCUBALINER™:** Matterhorn's Exclusive Proprietary Waterproof Lining System.

**Pillow Cushion 2:** Footwear cushioning designed to provide maximum anatomical support and comfort with an internal polyurethane midsole that cradles a dual density memory foam footbed.

**BOOT COMPONENTS**

**ADVANCED MATERIALS:**

**Cambrelle®:** The most abrasion-resistant fabric lining. It offers excellent moisture-wicking capabilities with its rapid moisture release technology. The result is superior warmth and comfort.

**GORE-TEX®:** GORE-TEX works from the inside of your footwear. With its millions of tiny pores, the membrane allows body moisture vapor to escape while preventing water penetration. Your feet remain dry and comfortable throughout a wide range of activities.

**Thinsulate™ Insulation:** This thin, light, warm insulation is perfect for footwear because of its durability and compression resistance. It features microfibers that trap dead air, absorbing water and maintaining warmth, even in damp conditions.

**Kevlar®:** With extraordinary toughness, these rugged fiber products enhance the tenacity, thermal stability and cut-resistance of any boot. They combine excellent protection with warm, fast drying comfort.

**Vibram®:** Outsoles technically designed to enhance performance in a variety of environments. The perfect base for a boot, these outsoles provide durable, efficient and comfortable tread designs. Vibram® is recognized as the world leader for high-performance in the most rugged footwear.

**AG7™ Footbed:** Supreme quality polyurethane comfort system with enhanced arch support and patented moisture management system built right in!

**D3O®:** D3O uses patented, patent-pending and proprietary technologies to make rate-sensitive, soft, flexible materials with high shock absorbing properties. In a market saturated with inflexible, uncomfortable and substandard metatarsal protection, D3O® Met Guards offer a low profile, soft and flexible solution.

**ADVANCED MATERIALS:**

**NEW!**

**XRD® Extreme Impact Protection** combines the latest materials science with ultimate design capabilities. Soft and flexible to the touch, yet tough on impact – XRD Technology is a lightweight, thin and breathable material that's engineered for repeated impact and shock absorption.

XRD is a licensed trademark of Rogers Corporation.

**NEW!**

**Matterhorn Contourical™ Internal MET**  
This innovative internal metguard is a unique combination of an ASYMMETRICALLY shaped polyurethane guard and plastic top shield designed to fit the distinct contours of both feet. Together they form a strong and comfortable defense against impact and compression unlike any other in the safety footwear industry.

**MT975 FEATURING:**

D3O®

D3O uses patented, patent-pending and proprietary technologies to make rate-sensitive, soft, flexible materials with high shock absorbing properties. In a market saturated with inflexible, uncomfortable and substandard metatarsal protection, D3O® Met Guards offer a low profile, soft and flexible solution.

**2019**

# CARE & CLEANING

## Waterproof Boots

- Pre-rinse.
- Gently wash boots with mild soap and water.
- Air dry naturally to keep leather soft and supple.
- Do not force dry with heat.
- Apply several thin layers of a top-quality leather cleaner and conditioner to all leather surfaces
- Follow with a generous application of liquid silicone to all seams.
- Clean and treat your boots at least once per month for ultimate wear.
- Any Cordura® or nylon should be treated with a spray coating of stain repellent.
- Do not spit shine waterproof boots.

## Non-Waterproof Boots

- Gently wash boots with mild soap and water.
- DO NOT USE: lighter fluid, rubbing alcohol, lacquer solvent, or methylene chloride.
- Use of these types of products will break down the tannery finish.
- Do not force dry with heat.
- Apply several thin layers of a Top-Quality paste polish.
- Keep your boots clean and well conditioned.
